WHATS NEW

CUSTOM

Patina is a custom manufacturer of fine plank flooring, French parquet, stair parts, borders, inlays and complementing trim work.

All our manufacturing is done manually by skilled artisans and finishers.

Every floor made by Patina is essentially a custom wood floor since there are so many variables in texture, color, special finishing processes and different lustres ranging from ultra matte to high gloss levels. All the flooring and other products going out our doors require a control sample signed by the responsible party prior to the start of production so the client can be sure of exactly what they will be receiving.

Installation is available through our [Henderson Wood Floors](#) installation company, specializing in custom installations.

Patina old world flooring, a leader and innovator of style in the wood flooring industry since 1995.

The company specializes in custom textures, colors and finishes ranging from ultra matte to high gloss finishes suitable for both commercial and residential application.

Custom millwork; stair parts, beams, ceilings, walls, parquet, inlays and borders available to complement.

Using different species, cuts, grades and textures creates an interesting looks and gives spaces an inviting and natural feel.

We try our best to keep the planet green and will work with you to get Leed points, FSC certification is available when needed.

Reclaimed flooring, beams and lumber are growing in popularity and is a beautiful option for reusing materials in both modern and more traditional settings. Patina manufactures some of its flooring of reclaimed lumber with options of both solid and engineered construction, to make it work in virtually any space.

ABOUT PATINA MODERN COLLECTION

Today's clients are not only challenged with the selection of species and color of wood flooring but are also faced with choices of texture and sheen. Patina has developed several different lines of customizable wood flooring as a starting point for choosing a floor in the vast range of custom wood flooring.

Patina Modern Floors has over seventy styles of flooring available to view here on the website. Being a custom manufacturer making everything by hand, we are not restricted by the capabilities of machinery, and it makes it possible for us to create just about any floor our clients' desire for both commercial and residential application.

Working with some of the leading architects and designers globally, Patina develops textures, colors and finishes based upon their requests.

Patina has been a leader and innovator of style in the wood flooring industry since 1995 when we first opened our doors. By staying ahead of fashion and trends, producing the very highest quality products possible and always standing behind our work, we are still the leaders in our niche with a much larger operation but still the same keen eye to detail and handmade quality.
